

## ISO Standards collection

# Materials for the production of primary aluminium

## Contents

<b>ISO 802:1976</b>	Aluminium oxide primarily used for the production of aluminium — Preparation and storage of test samples
<b>ISO 804:1976</b>	Aluminium oxide primarily used for the production of aluminium — Preparation of solution for analysis — Method by alkaline fusion
<b>ISO 805:1976</b>	Aluminium oxide primarily used for the production of aluminium — Determination of iron content — 1,10- Phenanthroline photometric method
<b>ISO 806:2004</b>	Aluminium oxide primarily used for the production of aluminium — Determination of loss of mass at 300 degrees C and 1 000 degrees C
<b>ISO 900:1977</b>	Aluminium oxide primarily used for the production of aluminium — Determination of titanium content — Diantipyrylmethane photometric method
<b>ISO 901:1976</b>	Aluminium oxide primarily used for the production of aluminium — Determination of absolute density — Pyknometer method
<b>ISO 902:1976</b>	Aluminium oxide primarily used for the production of aluminium — Measurement of the angle of repose
<b>ISO 903:1976</b>	Aluminium oxide primarily used for the production of aluminium — Determination of untamped density
<b>ISO 1232:1976</b>	Aluminium oxide primarily used for the production of aluminium — Determination of silica content — Reduced molybdosilicate spectrophotometric method
<b>ISO 1617:1976</b>	Aluminium oxide primarily used for the production of aluminium — Determination of sodium content — Flame emission spectrophotometric method
<b>ISO 1618:1976</b>	Aluminium oxide primarily used for the production of aluminium — Determination of vanadium content — N-Benzoyl-N-phenylhydroxylamine photometric method
<b>ISO 1619:1976</b>	Cryolite, natural and artificial — Preparation and storage of test samples
<b>ISO 1620:1976</b>	Cryolite, natural and artificial — Determination of silica content — Reduced molybdosilicate spectrophotometric method
<b>ISO 1693:1976</b>	Cryolite, natural and artificial — Determination of fluorine content — Modified Willard-Winter method
<b>ISO 1694:1976</b>	Cryolite, natural and artificial — Determination of iron content — 1,10- Phenanthroline photometric method
<b>ISO 2069:1976</b>	Aluminium oxide primarily used for the production of aluminium — Determination of calcium content — Flame atomic absorption method
<b>ISO 2070:1997</b>	Aluminium oxide primarily used for the production of aluminium — Determination of calcium content

<b>ISO 2071:1976</b>	Aluminium oxide primarily used for the production of aluminium — Determination of zinc content — Flame atomic absorption method
<b>ISO 2072:1981</b>	Aluminium oxide primarily used for the production of aluminium — Determination of zinc content — PAN photometric method
<b>ISO 2073:1976</b>	Aluminium oxide primarily used for the production of aluminium — Preparation of solution for analysis — Method by hydrochloric acid attack under pressure
<b>ISO 2366:1974</b>	Cryolite, natural and artificial — Determination of sodium content — Flame emission and atomic absorption spectrophotometric methods
<b>ISO 2367:1972</b>	Cryolite (natural and artificial) — Determination of aluminium content — 8-Hydroxyquinoline gravimetric method
<b>ISO 2828:1973</b>	Aluminium oxide primarily used for the production of aluminium — Determination of fluorine content — Alizarin complexone and lanthanum chloride spectrophotometric method
<b>ISO 2829:1973</b>	Aluminium oxide primarily used for the production of aluminium — Determination of phosphorus content — Reduced phosphomolybdate spectrophotometric method
<b>ISO 2830:1973</b>	Cryolite, natural and artificial — Determination of aluminium content — Atomic absorption method
<b>ISO 2865:1973</b>	Aluminium oxide primarily used for the production of aluminium — Determination of boron content — Curcumin spectrophotometric method
<b>ISO 2865:1973 / Cor. 1:1991</b>	Technical Corrigendum 1 to ISO 2865:1973
<b>ISO 2926:2005</b>	Aluminium oxide used for the production of primary aluminium — Particle size analysis for the range 45 m to 150 m — Method using electroformed sieves
<b>ISO 2927:1973</b>	Aluminium oxide primarily used for the production of aluminium — Sampling
<b>ISO 2961:1974</b>	Aluminium oxide primarily used for the production of aluminium — Determination of an adsorption index
<b>ISO 3390:1976</b>	Aluminium oxide primarily used for the production of aluminium — Determination of manganese content — Flame atomic absorption method
<b>ISO 3391:1976</b>	Cryolite, natural and artificial — Determination of calcium content — Flame atomic absorption method
<b>ISO 3393:1976</b>	Cryolite, natural and artificial, and aluminium fluoride for industrial use — Determination of moisture content — Gravimetric method
<b>ISO 3429:1976</b>	Sodium fluoride primarily used for the production of aluminium — Determination of iron content — 1,10-Phenanthroline photometric method
<b>ISO 3430:1976</b>	Sodium fluoride primarily used for the production of aluminium — Determination of silica content — Reduced molybdsilicate spectrophotometric method
<b>ISO 3431:1976</b>	Sodium fluoride primarily used for the production of aluminium — Determination of soluble sulphates content — Turbidimetric method
<b>ISO 3566:1976</b>	Sodium fluoride primarily used for the production of aluminium — Determination of chlorides content — Turbidimetric method
<b>ISO 3699:1976</b>	Anhydrous hydrogen fluoride for industrial use — Determination of water content — Karl Fischer method

<b>ISO 4280:1977</b>	Cryolite, natural and artificial, and aluminium fluoride for industrial use — Determination of sulphate content — Barium sulphate gravimetric method
<b>ISO 5930:1979</b>	Cryolite, natural and artificial, and aluminium fluoride for industrial use — Determination of phosphorus content — Reduced molybdophosphate photometric method
<b>ISO 5931:2000</b>	Carbonaceous materials used in the production of aluminium — Calcined coke and calcined carbon products — Determination of total sulfur by the Eschka method
<b>ISO 5938:1979</b>	Cryolite, natural and artificial, and aluminium fluoride for industrial use — Determination of sulphur content — X-ray fluorescence spectrometric method
<b>ISO 5939:1980</b>	Carbonaceous materials for the production of aluminium — Pitch for electrodes — Determination of water content — Azeotropic distillation (Dean and Stark) method
<b>ISO 5940:1981</b>	Carbonaceous materials for the production of aluminium — Pitch for electrodes — Determination of softening point by the ring-and-ball method
<b>ISO 5940-2:2007</b>	Carbonaceous materials used in the production of aluminium — Pitch for electrodes — Part 2: Determination of the softening point (Mettler softening point method)
<b>ISO 6257:2002</b>	Carbonaceous materials used in the production of aluminium — Pitch for electrodes — Sampling
<b>ISO 6374:1981</b>	Cryolite, natural and artificial, and aluminium fluoride for industrial use — Determination of phosphorus content — Atomic absorption spectrometric method after extraction
<b>ISO 6375:1980</b>	Carbonaceous materials for the production of aluminium — Coke for electrodes — Sampling
<b>ISO 6376:1980</b>	Carbonaceous materials for the production of aluminium — Pitch for electrodes — Determination of content of toluene-insoluble material
<b>ISO 6791:1981</b>	Carbonaceous materials for the production of aluminium — Pitch for electrodes — Determination of contents of quinoline-insoluble material
<b>ISO 6997:1985</b>	Carbonaceous materials for the production of aluminium — Calcined coke — Determination of apparent oil content — Heating method
<b>ISO 6998:1997</b>	Carbonaceous materials for the production of aluminium — Pitch for electrodes — Determination of coking value
<b>ISO 6998:1997 / Cor. 1:1999</b>	Technical Corrigendum 1 to ISO 6998:1997
<b>ISO 6999:1983</b>	Carbonaceous materials for the production of aluminium — Pitch for electrodes — Determination of density — Pycnometric method
<b>ISO 8003:1985</b>	Carbonaceous materials used in the production of aluminium — Pitch for electrodes — Measurement of dynamic viscosity
<b>ISO 8004:1985</b>	Carbonaceous materials for the production of aluminium — Calcined coke and calcined carbon products — Determination of the density in xylene — Pycnometric method
<b>ISO 8005:2005</b>	Carbonaceous materials used in the production of aluminium — Green and calcined coke — Determination of ash content
<b>ISO 8006:1985</b>	Carbonaceous materials used in the production of aluminium — Pitch for electrodes — Determination of ash

<b>ISO 8007-1:1999</b>	Carbonaceous materials used in the production of aluminium — Sampling plans and sampling from individual units — Part 1: Cathode blocks
<b>ISO 8007-2:1999</b>	Carbonaceous materials used in the production of aluminium — Sampling plans and sampling from individual units — Part 2: Prebaked anodes
<b>ISO 8007-3:2003</b>	Carbonaceous materials used in the production of aluminium — Sampling plans and sampling from individual units — Part 3: Sidewall blocks
<b>ISO 8008:2005</b>	Aluminium oxide primarily used for the production of aluminium — Determination of specific surface area by nitrogen adsorption
<b>ISO 8220:1986</b>	Aluminium oxide primarily used for the production of aluminium — Determination of the fine particle size distribution (less than 60 µm) — Method using electroformed sieves
<b>ISO 8658:1997</b>	Carbonaceous materials for use in the production of aluminium — Green and calcined coke — Determination of trace elements by flame atomic absorption spectrometry
<b>ISO 8723:1986</b>	Carbonaceous materials for the production of aluminium — Calcined coke — Determination of oil content — Method by solvent extraction
<b>ISO 9055:1988</b>	Carbonaceous materials for the production of aluminium — Pitch for electrodes — Determination of sulfur content by the bomb method
<b>ISO 9088:1997</b>	Carbonaceous materials used for the production of aluminium — Cathode blocks and prebaked anodes — Determination of the density in xylene by a pycnometric method
<b>ISO 9406:1995</b>	Carbonaceous materials for the production of aluminium — Green coke — Determination of volatile matter content by gravimetric analysis
<b>ISO 10142:1996</b>	Carbonaceous materials for use in the production of aluminium — Calcined coke — Determination of grain stability using a laboratory vibration mill
<b>ISO 10143:1995</b>	Carbonaceous materials for the production of aluminium — Calcined coke for electrodes — Determination of the electrical resistivity of granules
<b>ISO 10236:1995</b>	Carbonaceous materials for the production of aluminium — Green coke and calcined coke for electrodes — Determination of bulk density (tapped)
<b>ISO 10237:1997</b>	Carbonaceous materials for use in the production of aluminium — Calcined coke — Determination of residual-hydrogen content
<b>ISO 10238:1999</b>	Carbonaceous materials used in the production of aluminium — Pitch for electrodes — Determination of sulfur content by an instrumental method
<b>ISO 11412:1998</b>	Carbonaceous materials for the production of aluminium — Calcined coke — Determination of water content
<b>ISO 11713:2000</b>	Carbonaceous materials used in the production of aluminium — Cathode blocks and baked anodes — Determination of electrical resistivity at ambient temperature
<b>ISO 12977:1999</b>	Carbonaceous materials for use in the production of aluminium — Pitch for electrodes — Determination of volatile matter content
<b>ISO 12979:1999</b>	Carbonaceous materials for use in the production of aluminium — Pitch for electrodes — Determination of C/H ratio in the quinoline-insoluble fraction
<b>ISO 12980:2000</b>	Carbonaceous materials used in the production of aluminium — Green coke and calcined coke for electrodes — Analysis using an X-ray fluorescence method
<b>ISO 12981-1:2000</b>	Carbonaceous materials used in the production of aluminium — Calcined coke — Determination of the reactivity to carbon dioxide — Part 1: Loss in

	mass method
<b>ISO 12982-1:2000</b>	Carbonaceous materials used in the production of aluminium — Calcined coke — Determination of the reactivity to air — Part 1: Ignition temperature method
<b>ISO 12984:2000</b>	Carbonaceous materials used in the production of aluminium — Calcined coke — Determination of particle size distribution
<b>ISO 12985-1:2000</b>	Carbonaceous materials used in the production of aluminium — Baked anodes and cathode blocks — Part 1: Determination of apparent density using a dimensions method
<b>ISO 12985-2:2000</b>	Carbonaceous materials used in the production of aluminium — Baked anodes and cathode blocks — Part 2: Determination of apparent density and of open porosity using a hydrostatic method
<b>ISO 12986-1:2000</b>	Carbonaceous materials used in the production of aluminium — Prebaked anodes and cathode blocks — Part 1: Determination of bending/shear strength by a three-point method
<b>ISO 12986-2:2005</b>	Carbonaceous materials used in the production of aluminium — Prebaked anodes and cathode blocks — Part 2: Determination of flexural strength by the four-point method
<b>ISO 12987:2004</b>	Carbonaceous materials for the production of aluminium — Anodes, cathodes blocks, sidewall blocks and baked ramming pastes — Determination of the thermal conductivity using a comparative method
<b>ISO 12988-1:2000</b>	Carbonaceous materials used in the production of aluminium — Baked anodes — Determination of the reactivity to carbon dioxide — Part 1: Loss in mass method
<b>ISO 12988-2:2004</b>	Carbonaceous materials used in the production of aluminium — Baked anodes — Determination of the reactivity to carbon dioxide — Part 2: Thermogravimetric method
<b>ISO 12989-1:2000</b>	Carbonaceous materials used in the production of aluminium — Baked anodes and sidewall blocks — Determination of the reactivity to air — Part 1: Loss in mass method
<b>ISO 12989-2:2004</b>	Carbonaceous materials used in the production of aluminium — Baked anodes and sidewall blocks — Determination of the reactivity to air — Part 2: Thermogravimetric method
<b>ISO 14420:2005</b>	Carbonaceous products for the production of aluminium — Baked anodes and shaped carbon products — Determination of the coefficient of linear thermal expansion
<b>ISO 14422:1999</b>	Carbonaceous materials used in the production of aluminium — Cold-ramming pastes — Methods of sampling
<b>ISO/TS 14423:1999</b>	Carbonaceous materials used in the production of aluminium — Cold-ramming pastes — Determination of effective binder content and aggregate content by extraction with quinoline, and determination of aggregate size distribution
<b>ISO/TS 14425:1999</b>	Carbonaceous materials used in the production of aluminium — Cold-ramming pastes — Determination of volatile-matter content of unbaked pastes
<b>ISO 14427:2004</b>	Carbonaceous materials used in the production of aluminium — Cold and tepid ramming pastes — Preparation of unbaked test specimens and determination of apparent density after compaction

<b>ISO 14428:2005</b>	Carbonaceous materials for the production of aluminium — Cold and tepid ramming pastes — Expansion/shrinkage during baking
<b>ISO 14435:2005</b>	Carbonaceous materials for the production of aluminium — Petroleum coke — Determination of trace metals by inductively coupled plasma atomic emission spectrometry
<b>ISO 15379-1:2004</b>	Carbonaceous materials for the production of aluminium — Cathode block materials — Part 1: Determination of the expansion due to sodium penetration with application of pressure
<b>ISO 15379-2:2004</b>	Carbonaceous materials for the production of aluminium — Cathode block materials — Part 2: Determination of the expansion due to sodium penetration without application of pressure
<b>ISO 15906:2007</b>	Carbonaceous materials for the production of aluminium — Baked anodes — Determination of the air permeability
<b>ISO 17499:2006</b>	Carbonaceous materials used in the production of aluminium — Determination of baking level expressed by equivalent temperature
<b>ISO 17500:2006</b>	Aluminium oxide used for the production of primary aluminium — Determination of attrition index
<b>ISO 17544:2004</b>	Carbonaceous materials used in the production of aluminium — Cold and tepid ramming pastes — Determination of rammability of unbaked pastes
<b>ISO 18515:2007</b>	Carbonaceous materials for the production of aluminium — Cathode blocks and baked anodes — Determination of compressive strength
<b>ISO 20202:2004</b>	Carbonaceous materials used in the production of aluminium — Cold and tepid ramming pastes — Preparation of baked test pieces and determination of loss on baking
<b>ISO 20203:2005</b>	Carbonaceous materials used in the production of aluminium — Calcined coke — Determination of crystallite size of calcined petroleum coke by X-ray diffraction
<b>ISO 21687:2007</b>	Carbonaceous materials used in the production of aluminium — Determination of density by gas pycnometry (volumetric) using helium as the analysis gas — Solid materials
<b>ISO 23202:2006</b>	Aluminium oxide used for the production of aluminium — Determination of particles passing a 20 micrometre aperture sieve
