# *The ISO Global Directory*

-

## *User & role management*

Reinhard Weissinger, ISO Central Secretariat

ISO TC/SC Chair' Conference

Geneva, 16-17 June 2005

# What is the « ISO Global Directory »?

A database to manage data related to

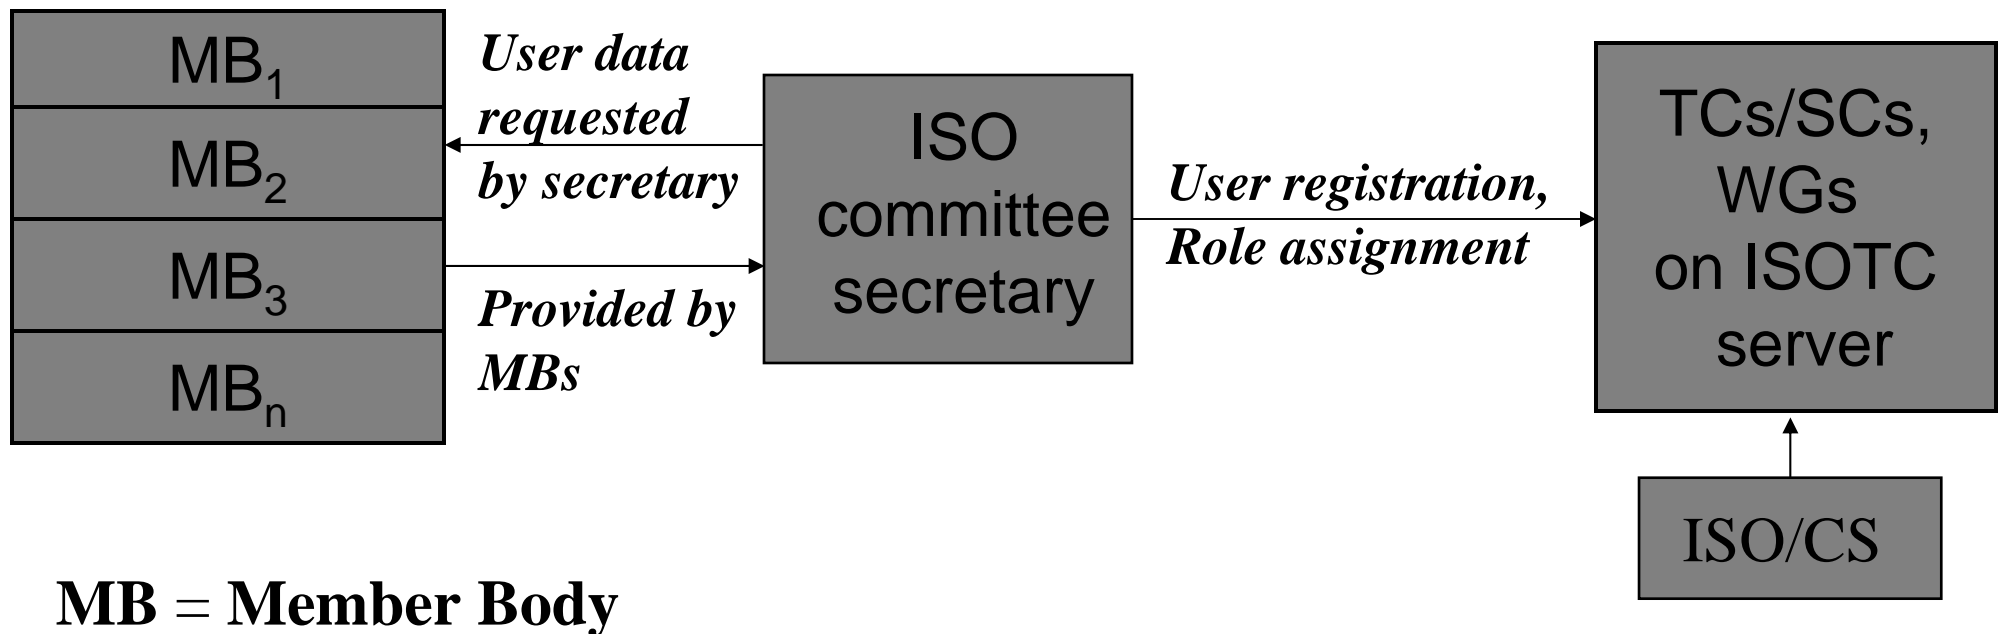

- **users**
- **and their roles**
- **participating in ISO committees, working groups & other functions (e.g. balloting)**

in an electronic working environment

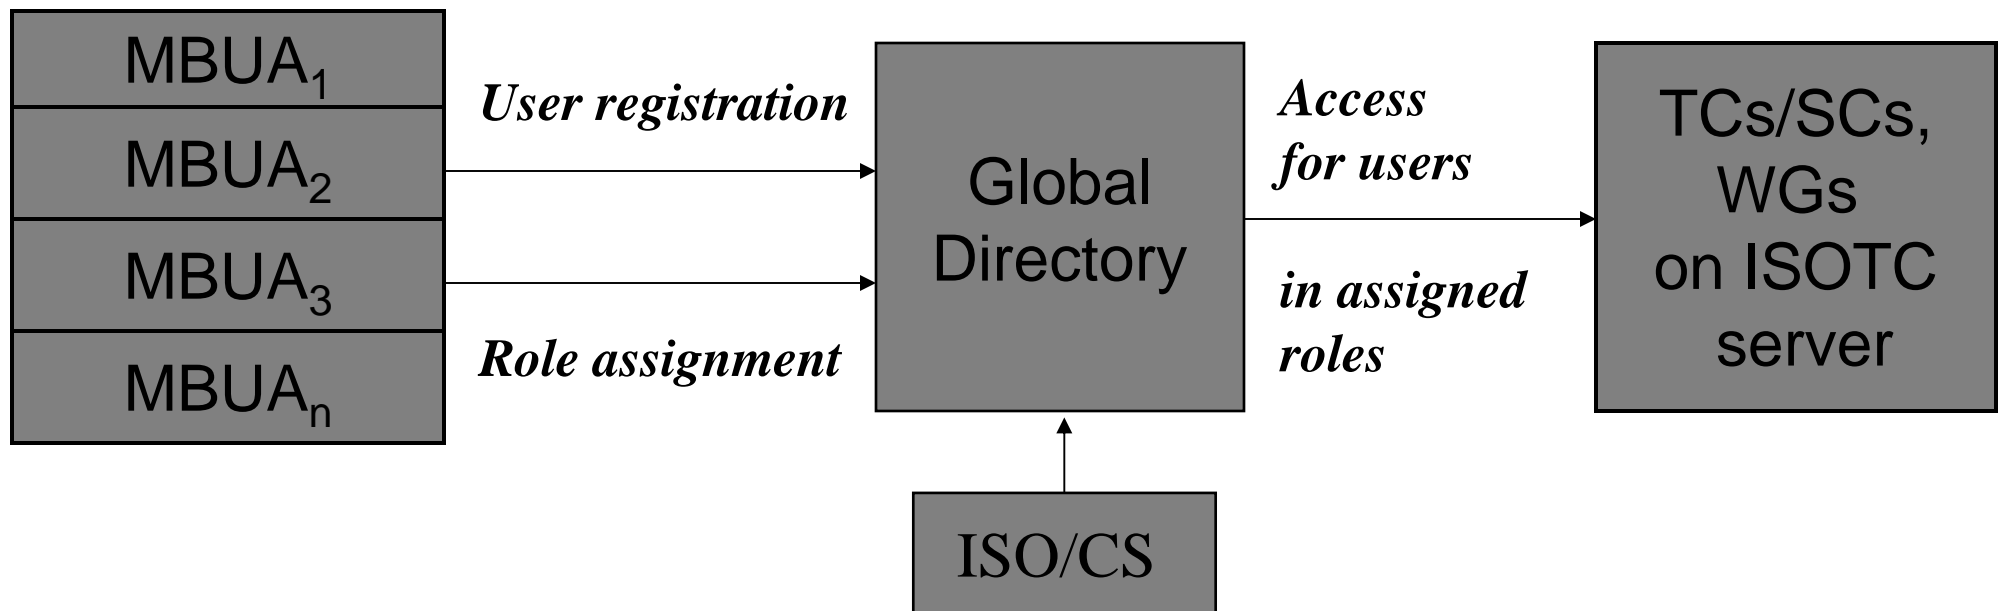

# Objectives – ISO Global Directory

- **Fundamental to all ISO applications related to standards development**
- Consistent definitions of ISO business roles
- Decentralized management of the registration of users and their assignment to roles by **ISO member bodies for their representatives**
- Possibility to **delegate the user registration** and role assignments to other organizations (for certain committees)
- « Ownership » of user data is with one organization (member body) only

# User registration (currently)

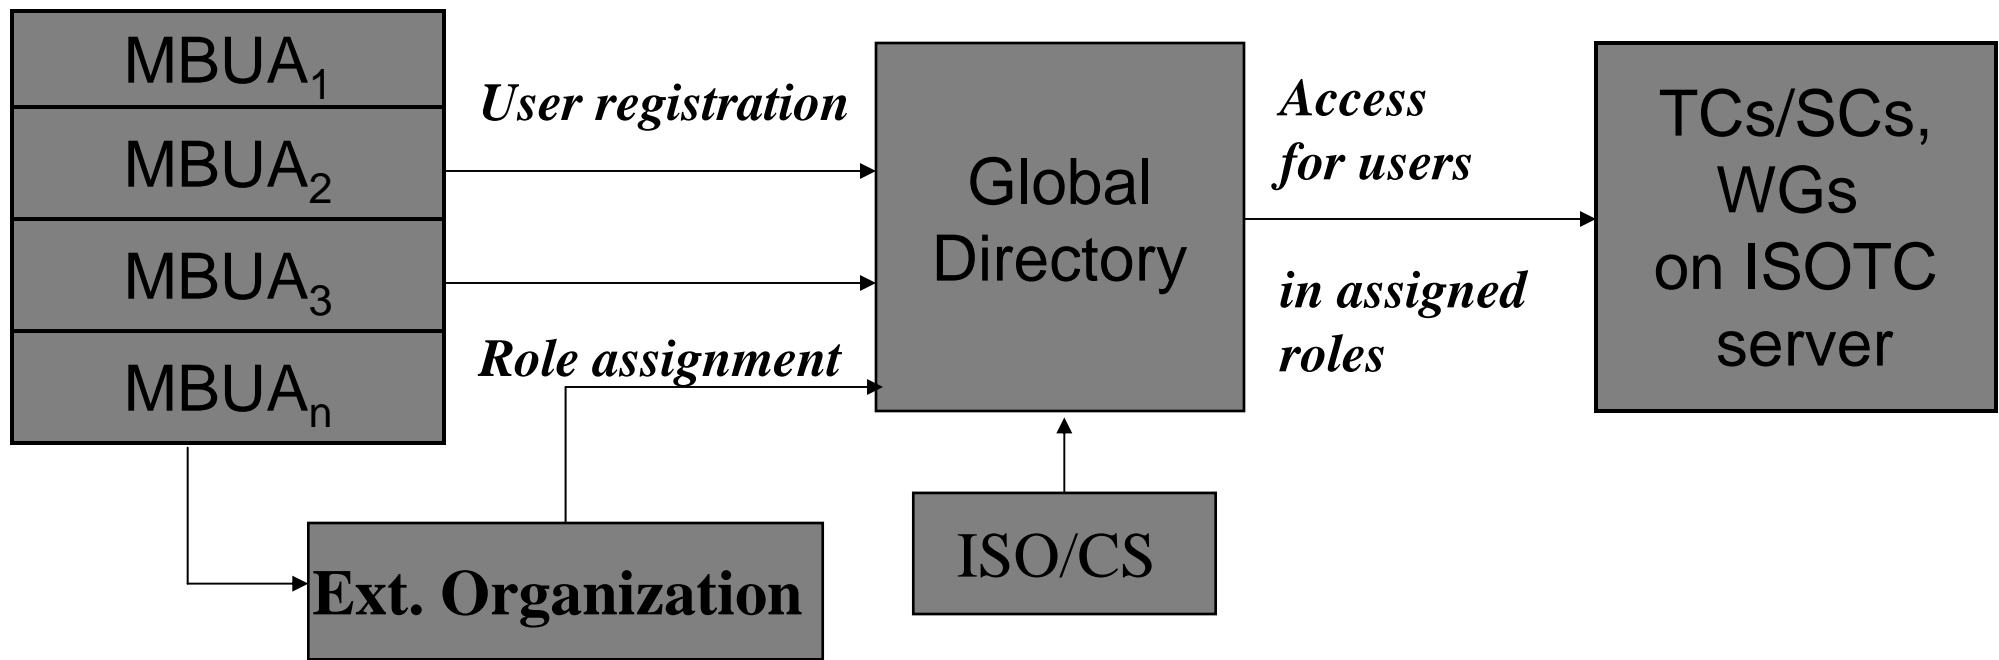

# User registration (with Global Directory)

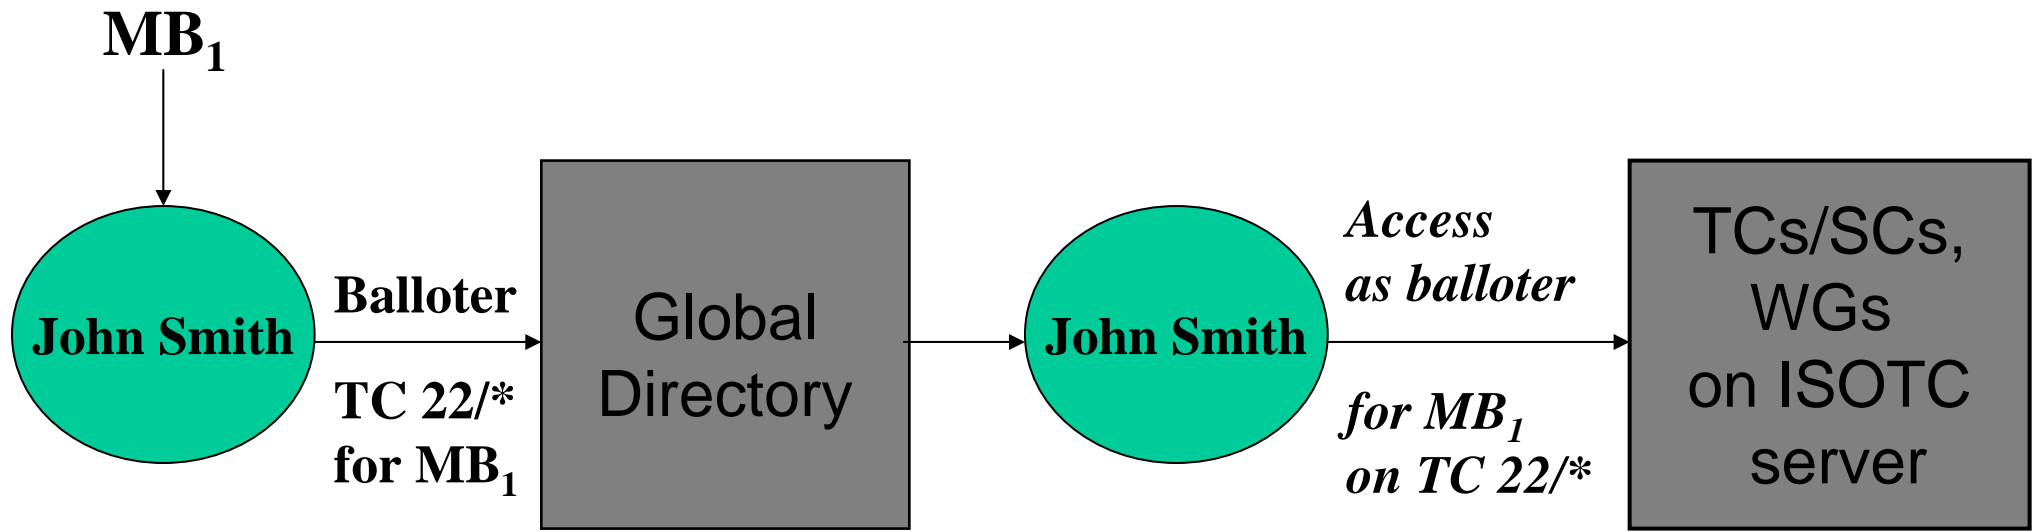

**MBUA = Member Body User Administrator**

# Delegation of maintenance rights

**MBUA = Member Body User Administrator**

# User registration/role assignment - Example

# GD introduction – The main changes

- User & role data will be maintained by member body user administrators
- Committee secretaries will be relieved from user registration and user maintenance
- ISO/CS will support user & role management in the transition period (app. 1 year)

# Objectives – ISO Global Directory

- Member bodies gain responsibility for the user registration (ISO/IEC Directives)
- Decentralization of maintenance of user data
- Council policy on privacy and data protection

# Maintenance of main business roles (initial)

## Maintained by ISO member bodies:

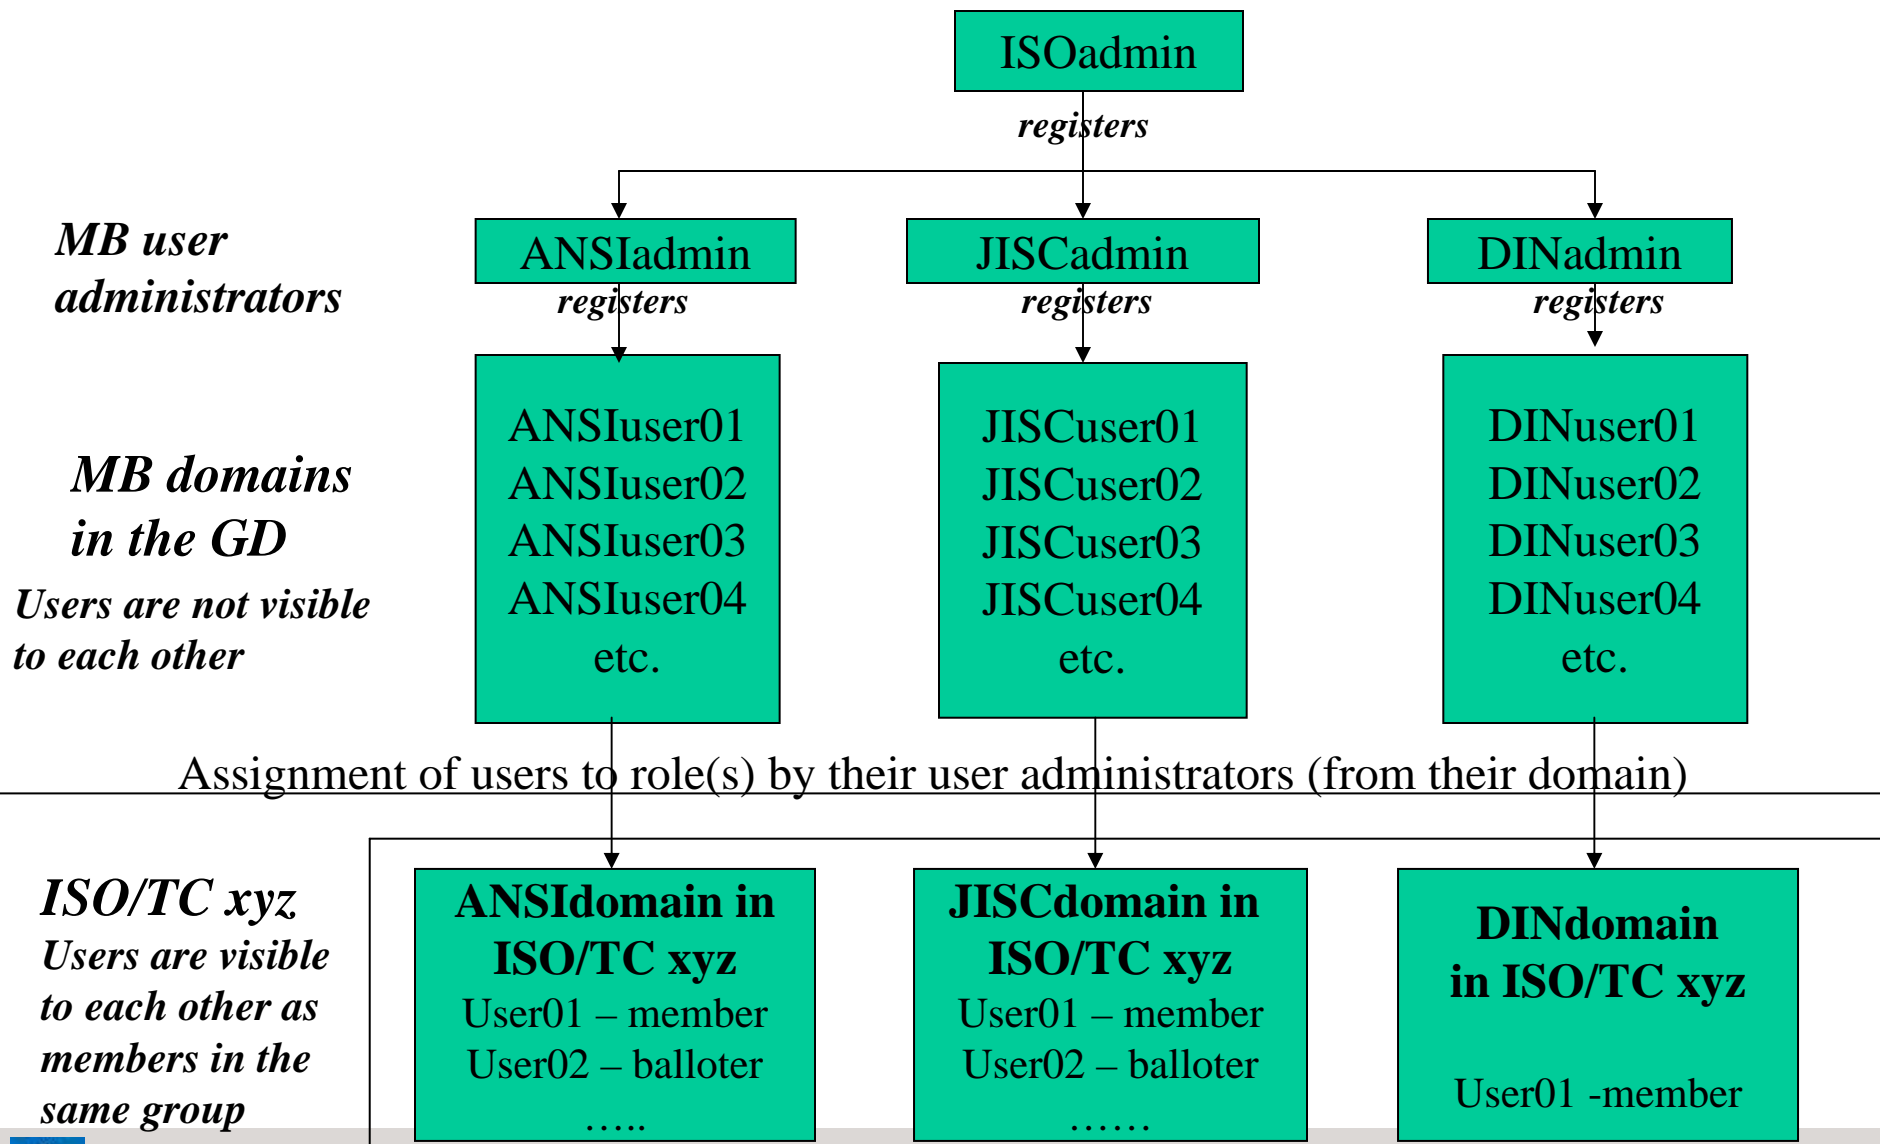

- Representatives to committees and WGs
- DIS/FDIS balloters
- Balloters in committees

## Maintained by ISO/CS:

- Committee secretaries
- Committee chairs
- WG convenors and project leaders
- Representatives of external liaison organizations
- Internal liaisons with ISO and IEC committees

# Global Directory – Basic architecture

*(example for three member bodies)*

*MB user administrators*

*MB domains in the GD*

*Users are not visible to each other*

*ISO/TC xyz  
Users are visible to each other as members in the same group*

# Options for data update

- Start: Data of users are migrated from existing data sources (ISOTC server etc.) to the Global Directory
- Manual data entry via the GD user interface
- Bulk upload of data from databases maintained by member bodies using a defined interchange file format

# Roadmap for GD-rollout

## **Until begin July 2005:**

- Migration of user data from the ISOTC server to the GD

## **Mid July 2005:**

- Use of GD by ISO/CS in-house

## **Begin September 2005:**

- Start of training program for member body user administrators

# GD: Login screen

## Declaration related to the permission to access non-public committee areas on the ISOTC server and the handling of documents and data, including authorization to use participants' personal data in the "Electronic Committees"

The participant undertakes to use the information he or she receives within the electronic committees solely as intended to support the standards development work of the electronic committees, to desist from exploiting the information for other purposes, and to respect ISO and governmental data protection and copyright rules and regulations. This obligation on the participant survives termination of his or her participation in the electronic committees. In particular, the passing-on of one's login name and password is not permitted. The participant agrees not to provide access to unauthorized persons. The participant consents to his or her personal contact information being used and shared to support the work of the electronic committees and in particular for the administration of access rights in connection with international (and/or regional) standardization in the electronic committees. The permission to access protected working areas of ISO committees on the ISOTC server depends on the authorization of a user by the ISO member body or liaison organization which has appointed the user. A member body or liaison organization may decide at their discretion to withdraw this permission.
