This new online collection for IT management expands our successful collection on information security management (ISO/IEC 27000 series), providing centralized access to more than 60 of ISO’s most important standards. It is intended to benefit CIOs and IT managers dealing in information technology processes in virtually every business, big and small.

**What industry will use the collection?**
- All industries, services and regulators

**Which sectors are covered?**
- All sectors and services

**How you can benefit**
- It gives access to all the standards you need for certification to ISO/IEC 27000
- It provides access to other management standards such as ISO 9001 (quality management), ISO 50001 (energy management), ISO 31000 (risk management) and ISO 21500 (project management)
- It covers selected topics of systems and software engineering: application management, software life-cycle processes, system life-cycle processes, architecture description

**This collection is available on ISO’s Online Browsing Platform (OBP)**

www.iso.org/obp

The OBP is a one-stop shop where you will find the entire collection of ISO International Standards as well as related material such as international symbols, terms and definitions, and country codes.

**Subscribe now**

With a yearly subscription to this online collection, you are guaranteed:
- Your personal library where you will find your selected portfolio of standards
- Easy navigation through embedded links to other documents
- Multiple language interface that lets you reach identical sections of a document in other language versions
- Access from any device as long as you have an Internet connection
