

Registration of final draft International Standards (FDIS)

The document will be registered provided that it complies with the requirements listed below.

- ₁ Provide the complete revised text of each language version, unless Council resolution 21/1986 applies.
Make sure that the texts comply with the ISO/IEC Directives, Part 2, [Rules for the structure and drafting of International Standards](#).
Present each language version as a separate document unless it is intended that the final standard will be presented in multilingual form (e.g. terminology standards).
Make sure that each language version is complete, including all figures, tables, formulae and annexes, and has been properly and correspondingly amended. In case of difficulty in preparing the second language version in French or in English, please seek assistance from AFNOR or BSI respectively.
If a single language version is submitted, indicate whether or not a second language version is expected and, when necessary, confirm to ISO/CS the dates when the translation(s) has (have) been requested.
Check that *all* changes listed in annex B to the report of voting as having been accepted have been made in the revised text.
- ₂ Upload the following electronic files to the [submission interface](#).
- Revisable word processor files, prepared using one of the ISO templates, without figures embedded.
 - Graphics files, as separate files.
 - PDF files of the complete texts, including all figures, tables, formulae and annexes at the correct places in the text and in the correct orientation, to serve as a reference copy. (More information about PDF and ways of making it can be found at the following URL: <http://www.iso.org/pdf>.)
- Give all necessary information relative to the files uploaded.
Ensure compliance with the requirements given in the document [ISO Central Secretariat requirements for provision of text and graphics in electronic form](#).
- ₃ Indicate which language is the original (or reference) version.
- ₄ Provide the completed report of voting ([Form 13](#)), including the [template for comments and secretariat observations](#) indicating the action taken on comments and, if any comments have not been accepted, the reasons why.
- ₅ For ISO-lead *candidate harmonized documents* developed under the Vienna Agreement, provide in [Annex ZA](#) the relevant essential requirements of European Directive(s) or other provisions of EU Directives that the document supports.
- ₆ Give information regarding [patent rights](#) and [trade names](#), if applicable.
- ₇ When the DIS was approved by 100 % of the P members, indicate whether the document can be published directly and without submission to an approval vote (not applicable to documents developed under the Vienna Agreement).
- ₈ Give any special requirement (e.g. use of colours, photographs, electronic media, etc.).
- ₉ Provide the name of the project leader and/or document editor.

NOTE 1 Secretariats wishing to supply "ready-to-publish" documents should discuss details directly with the ISO Central Secretariat.

NOTE 2 When a document listed as a normative reference is not a document published by ISO and/or IEC, a copy may be requested by the ISO Central Secretariat for reference purposes.

NOTE 3 The document [Elements to be provided when submitting drafts to the ISO Central Secretariat](#) summarizes the requirements for the different types of document.
