

WTO TBT Standards Code Directory

Standardizing bodies having
accepted the WTO TBT Code
of Good Practice for the
Preparation, Adoption and
Application of Standards

ISO (International Organization for Standardization) and IEC (International Electrotechnical Commission) are non-governmental organizations that form a specialized system for worldwide standardization. National bodies that are members of ISO or IEC participate in the development of International Standards through technical committees established by the respective organization to deal with particular fields of technical activity. ISO and IEC technical committees collaborate in fields of mutual interest. Other international organizations, governmental and non-governmental, in liaison with ISO and IEC, also take part in the work.

WTO (World Trade Organization) is the legal and institutional foundation of the multilateral trading system. It provides contractual obligations determining how governments frame and implement domestic trade legislation and regulations for

their trade in goods and services. The WTO also administers an agreement concerning the trade-related aspects of intellectual property rights. The WTO serves as the platform in which trade relations among countries evolve through collective debate, negotiation and adjudication. Its four main responsibilities include: administering and implementing the multilateral and plurilateral trade agreements which together make up the WTO; acting as a forum for multilateral trade negotiations; resolving trade disputes between member governments and cooperating with other international institutions involved in global economic policy making.

The purpose of this Directory is to give systematized information on standardizing bodies having accepted the WTO TBT Code of Good Practice for the Preparation, Adoption and Application of Standards.

Foreword

The World Trade Organization was established on 1 January 1995. As of 1 January 2009, there were 153 Members (central governments). The Agreement on Technical Barriers to Trade is one of the 29 individual legal texts of the WTO Agreement which obliges Members to ensure that technical regulations, voluntary standards and conformity assessment procedures do not create unnecessary obstacles to trade. Annex 3 of the TBT Agreement is the *Code of Good Practice for the Preparation, Adoption and Application of Standards*. In accepting the TBT Agreement, WTO Members agree to ensure that their central government standardizing bodies accept and comply with this Code of Good Practice and agree also to take reasonable measures to ensure that local government, non-governmental and regional standardizing bodies do the same (for the definition of “standardizing bodies” see ISO/IEC Guide 2). The Code is therefore open to acceptance by all such bodies.

The TBT Agreement recognizes the important contribution that international standards and conformity assessment systems can make to improving efficiency of production and facilitating international trade. Where international standards exist or their completion is imminent, therefore, the Code of Good Practice says that standardizing bodies should use them,

or the relevant parts of them, as a basis for standards they develop. It also aims at the harmonization of standards on as wide a basis as possible, encouraging all standardizing bodies to play as full a part as resources allow in the preparation of international standards by the relevant international bodies, including the ISO and IEC.

In the interest of transparency, the Code requires that standardizing bodies that have accepted its terms notify this fact to the joint ISO/IEC Information Centre located at the ISO Central Secretariat in Geneva, either directly or through the relevant national/international member of ISONET. At least once every six months, standardizing bodies must publish their work programmes and also notify the existence of their work programmes to the ISO/IEC Information Centre. Other important provisions relate to the preparation, adoption and application of standards.

The present Directory lists all standardizing bodies that had notified acceptance of the WTO TBT *Code of Good Practice for the Preparation, Adoption and Application of Standards* by 1 January 2009. The Directory also contains the addresses of these standardizing bodies and information related to the availability of their work programmes.

How to use this Directory

Each entry in the WTO Standards Code Directory is presented in the following format:

<i>Name of the standardizing body</i>	
Address	Address of the standardizing body, including telephone, fax, telex, E-mail
Type of standardizing body	Whether a central government body, a local government body or a non-governmental body
Scope	Scope of current and expected standardization activities
Publication	Name and issue of the publication in which the work programme is published
Period	The period to which the work programme applies or the frequency of its updating
Price	The price (if any) of the work programme
Contact	How and where the work programme can be obtained

CANADA

Standards Council of Canada (SCC)

Address

270 Albert Street, Suite 200
CA-OTTAWA, ONTARIO K1P 6N7

Tel. + 1 613 238 32 22
Fax + 1 613 569 78 08
E-mail info@scc.ca
Web www.scc.ca

Type of standardizing body

Central government

Scope

The scope is unlimited. SCC approves National Standards of Canada (NSCs) in every subject area. SCC does not itself develop standards but accredits Standards Development Organizations (SDOs) which carry out standards development and submit candidate NCS's to SCC for approval. The following four SDOs are accredited by SCC: Bureau de normalisation du Quebec (BNQ), Canadian General Standards Board (CGSB), CSA International, Underwriters' Laboratories of Canada (ULC).

Publication

Work programmes of the accredited SDOs are available directly from each organization. Information on the accredited SDOs on whose behalf SCC notifies its acceptance of the *Code of Good Practice for the Preparation, Adoption and Application of Standards* is available on the SCC homepage at: www.scc.ca/about/sdoe.html. Those unable to access the information electronically, and those having specific questions about the SDOs may request information from the WTO TBT Enquiry Point for Canada at the contact address below.

Type of standardizing body Non-governmental

Scope CEI mission, as the Italian Standardization Organization in the electric, electronic and telecommunications fields, is to improve the quality of life, safety of people and environment protection, meeting the rights, needs and ideas of the community, through the broad consensus of all parties involved in the standardization process.
This mission is fulfilled by and pursuing the following goals:
- preparation, publication, promotion and distribution of technical standards in the electric, electronic and telecommunications fields for materials, equipment, machinery, installations, processes and programs, setting the relevant quality and safety requirements needed for their conformity with the best practices;
- promotion and dissemination of technical-scientific culture and of electrical safety in particular, performing a number of standardization and pre-standardization activities, including: publication of technical standards at national level; endorsement of those harmonized according to European Directives; co-ordination actions, research & development, communication and training activities in co-operation with the other parties involved in the standardization process at a domestic, European and international level.

Publication A printout of data related to the work programme is available on request

Period Continuously updated

Type of standardizing body	Central government
Scope	<p>The preparation, establishing, adoption and application of standards. KAZMEMST implements the State policy in the field of Technical Regulation and maintenance of uniformity of measurements. KAZMEMST forms the State systems of Technical Regulation and maintenance of uniformity of measurements.</p> <p>As of today, Kazakhstan is working on the formation of the technical legislation and normative legal acts with a view to reforming the system of technical regulation and the accession of the Republic into the World Trade Organization. Legislative and normative bases should be harmonized as much as possible with the international requirements and standards. With the adoption of an international system of technical regulation, the "Technical Regulation" Law of the Republic of Kazakhstan has considerably expanded the sphere of application of standards. The main directions of work in the field of standardization are:</p> <ul style="list-style-type: none">- development of evidence-based foundations for observance of mandatory requirements of technical regulations;- removal of technical barriers to trade by harmonization of domestic standards with international equivalents;- higher level of safety and competitiveness of products, implementation of modern methods of management of quality and environmental issues. <p>According to the Law of the RK, the reforming of the existing system of technical regulation stipulates creation of a two-level system: technical regulations containing all obligatory public requirements on product safety, and voluntary standards including norms of competitiveness for such products.</p>

PERU

Instituto Nacional de Defensa de la Competencia y de la Protección de la Propiedad Intelectual (INDECOPI)

Address	Calle De la Prosa 138 San Borja PE-Lima 41 Tel. + 51 1 224 78 00 Fax + 51 1 224 03 48 E-mail standards@indecopi.gob.pe Web www.indecopi.gob.pe
Type of standardizing body	Central government
Scope	<p>Through the Standardization and non-tariff barriers Surveillance Commission, INDECOPI acts as Peru's Standardization Organization. It has 100 Technical Standardization Committees covering several areas of national interest, with the participation of a number of institutions and experts from the production, consumption and technical sectors, both at public and private levels. INDECOPI is the organization designated as the National Information Service for Standards and voluntary Procedures of Conformity Evaluation. At international level, it has full membership of ISO (as P-Member on 14 Committees and as O-Member on 3 Committees), and it is an affiliated member of IEC (on 3 Committees). In relation to the Codex Alimentarius, it participates in 4 World Committees coordinating directly with contact points in the country.</p> <p>At regional level, it is a member of PASC, COPANT and CAN. INDECOPI's main goal this year is to increase the number of national standards that are harmonized with international standards, and with this in mind, it seeks to vote systematically in the committees in which it has P-Membership at ISO level, and to participate actively in the mirror committees established in the framework of ISO, IEC and CODEX ALIMENTARIUS.</p> <p>The Standardization Programme for this year plans to approve at least 205 Peruvian Technical Standards in, among others, the following main sectors: Agro-Industry, Fishing, Energy, Textile-Clothing, Chemical Technology, Construction, Clean-up, Electrical Security, Environmental Management, Quality Management and Conformity Evaluation.</p>
Publication	1) Standardization Plan for 2009 / Peruvian Technical Standards Drafts under public discussion www.indecopi.gob.pe 2) Peruvian Technical Standards approved in 2008: http://www.bvindecopi.gob.pe/nortec.html
