TC 46 - Information and Documentation
SC 4 - Computer Applications

Technical Committee 46/Subcommittee 4 (TC46/SC4) is the International Organization for Standardization (ISO) Subcommittee responsible for technical standards used to facilitate interoperability of information services such as libraries, information centers, indexing and abstracting services, archives, and publishers. These technical standards include standards for information retrieval and interlibrary loan, applications of SGML, data elements directories, data formats, character sets, codes and user commands.
