Introduction

Tanzania Bureau of Standards (TBS) was established under the Ministry of Industry and Trade by an Act of Parliament, the Standards Act No.3 of 1975 as the National Standards Institute and became operational in April 1976. It was subsequently renamed Tanzania Bureau of Standards through an amendment to the Act by Act No.1 of 1977. The Standards Act No. 3 was later repealed and replaced by the Standards Act No. 2 of 2009, which gave the Bureau more powers in carrying out its mandate.

TBS is the statutory National Standardization Body for Tanzania, mandated to formulate, promulgate and implement standards.

The Bureau has an established national standardization system through which national standards are formulated. This system is based on the '*consensus principle*' which works through the use of technical committees. These committees draw members from all stakeholder groups including industries, government ministries and institutions, research institutions, higher learning institutions, business organizations and consumers. So far TBS has been able to finalize more than 2000 Tanzania standards.

The finalized standards include product standards, management system standards, test methods, codes of practice and codes of hygiene. The standards cover various sectors of the economy including food and agriculture, chemicals, textiles and leather, engineering, environment and general techniques.

The standards formulated are voluntary, however if a standard covers a product that can affect health, safety, the environment or can have significant impact to the national economy, such standard is published as a compulsory standard.

The results of the TBS technical standards work are published as Tanzania National Standards. It is the policy of TBS to adopt other regional and international standards when they are found to be applicable to the Tanzanian situation. The list of published Tanzania standards is given in the *Catalogue of Tanzania Standards* which is available online on TBS website, <http://www.tbs.go.tz/standards/>

During the development of Tanzania Standards, documents pass through a number of stages before they can be approved as Tanzania Standards. This procedure is designed to ensure that the final result is acceptable to as many interest groups as possible.

The *Standards development work programme bulletin* contains a list of all standardization projects in progress and is published twice a year, in July and January.

Example; TBS/BCDC - 2 (3542) P₁ -title of a project.

It should be noted that the project number is used as reference to the draft standard under development. Different number is given when the document becomes a Finalized Draft Tanzania Standard where the same TZS number (of previous edition) is given for revised document and new number is given for the new document.

Stage codes of Tanzania Standards development:

Depending on its development stages, a Draft Tanzania Standard (DTZS) shall be coded NWIP, P1, P2, P3 and FTZS

Where,

- NWIP New Work Item Proposal
- P1 draft Tanzania Standard for presentation to TC.
- P2 draft Tanzania Standard for presentation to DC.
- P3 draft Tanzania Standard for stakeholder's comments.
- FTZS Finalized Draft Tanzania Standard to BoD for approval

Stage Date

The stage date is the date on which the action or decision has been taken. For example, stage date 2018-12-01 means that on 2018-12-01 a draft has been recommended by TC to DC.

Target date (TA)

A target date shows the date when the document is expected to be published as a Tanzania National Standard.

International Classification for Standards (ICS) Outline of the main ICS subject fields

Main subject areas (e.g. Food & agriculture, civil engineering, chemical etc.) and TC subject fields such as cereals and pulses, stimulants, horticultural fresh produce, etc. are given the ICS (International Classification for Standards) number(s) under which the subject matter is classified.
